

CSS Studio — Personalized Outreach Email Templates

You send these yourself. Fill every [bracket] . Rules that make cold/warm emails work:

- **Short** (under 120 words). Investors skim on phone.
 - **One ask**, one link. The product demo does the convincing — lead people to it.
 - **Personalize the first line** (why *them* specifically) — never paste a generic blast.
 - **Subject line matters most**. Keep it concrete and curious.
 - Best path: get a **warm intro**; use the "ask for intro" template with your network first.
-

A. Warm-intro REQUEST (to someone in your network who knows the investor)

Subject: Quick intro to [Investor name]?

Hi [Friend],

Hope you're well! I've been heads-down building **CSS Studio** — open the app and a music video plays, with sound, instantly; then you can create your own in the same screen. It's the "watch + create" layer for AI video that Suno (audio-only) and Sora (video-only) don't do.

I'm raising a small pre-seed and would love a warm intro to **[Investor]** — I think it fits their thesis on [consumer AI / creator tools / media]. 60-second demo here: [link].

No worries if it's not a fit. Thank you either way!

[Jing]

B. Direct to investor — WARM (you were introduced)

Subject: CSS Studio — the audible, in-cinema "watch + create" layer for AI video

Hi [Investor], thanks [Referrer] for connecting us.

CSS Studio: open the app → a fully-produced music video plays *with sound*; type one line → it generates and plays in the same full-screen cinema. Suno is audio-only, Sora is video-only —

we own the experience, with lyrics/audio/video kept as separate layers (so any work is instantly re-voiceable in any language).

Product is built and live; we're pre-launch, raising a small pre-seed to launch and prove retention. 60-sec demo: [link]. Deck: [link].

Could I show you a live 15-min demo next week?

[Jing] · [phone] · [calendar link]

C. Direct to investor — COLD (no intro; lower odds, still personalize line 1)

Subject: Open the app, a music video plays — with sound

Hi [Investor],

I'm reaching out because of your [investment in X / post about AI consumer apps] — this is in that lane. **CSS Studio** is the first zero-friction "watch + create" platform for AI music videos: audible full-screen feed, and you create your own without leaving the cinema. The wedge competitors miss: never burning audio/video together, so every work is multi-language & multi-voice.

Built and live; pre-launch; raising a small pre-seed. 60-sec demo: [link].

Worth a 15-minute look?

[Jing] · [link]

D. Accelerator application blurb (YC / a16z Speedrun / etc.)

What does your company do? (1–2 sentences)

CSS Studio is the first zero-friction platform to *watch* fully-produced AI music videos (audible, full-screen, instantly) and *create* your own in the same screen — multi-language, multi-voice. We own the AI-video-with-sound consumption layer that audio-only (Suno) and video-only (Sora) tools leave empty.

Why now / why you:

Generation got cheap; the destination layer is empty. Founder has solo-built a deep, self-healing platform (layered pipeline, civilization-aware generation, in-cinema creation)

and is ready to launch.

E. Strategic partner (label / short-drama studio / distribution)

Subject: Partnership — multilingual AI music video + short-drama, in one cinema

Hi [Name],

CSS Studio turns a single idea into a full music video — and re-voices it into any language automatically (separate audio/video layers). We're extending the same pipeline to short-drama and series. I think there's a fit with [their catalog / distribution / audience].

Open to a quick call to explore a pilot? 60-sec demo: [link].

[Jing]

Follow-up (if no reply after ~5–7 days — send ONCE)

Subject: Re: [original subject]

Hi [Name] — quick bump in case this slipped. 60-sec demo if useful: [link]. Happy to be told
it's not a fit. Thanks!

Target-list buckets to build (10–20 names total to start)

- Consumer-AI / creator-tools seed & pre-seed angels who *ship*.
- Media/entertainment & creator-economy seed funds.
- Accelerators (YC, a16z Speedrun, regional).
- Strategic: music labels, short-drama studios, telco/handset distribution, Gulf consumer funds.

Prioritize anyone you can reach via a **warm intro**. Quality of intro > size of fund.
